

Tot Discovery Days

for ages 5 and under

Tot Discovery Days are a casual “drop-in” program just for you and your preschooler! The first Friday of the month, we set up activities and interactive learning stations designed to ignite your child’s curiosity and interest in science.

Cool Chemistry

Friday, June 6, 10 am - noon

Come explore the fun of chemical reactions that fizz, bang and ooze. We'll learn basic chemistry facts while mixing together many (safe, non-toxic) materials and watching them transform right before your eyes.

No July Discovery Day—We'll see you in August!

Limited to children ages 5 and under only, accompanied by parent or guardian.

Members: FREE!

Non-members: \$10 per parent/child combo. Additional children \$2 each.

Goes Buggy!

Friday, August 1, 10 am - noon

You and your child will get up close and personal to the little animals that creep and crawl! We will look at insects under the magnifying glass to find out how they navigate through the world around them. We will also learn the difference between an insect and a spider, as toddlers make their own fun bug craft.
